Re: Updated Mask Information

Please see the letter on the reverse side of this memo from the Commissioner of Health and Education for New York State. Today, March 2nd, the statewide requirement for masks in schools has ended. However, the Department of Health has made one masking requirement for students and staff. **If your child or a CPCS staff member has tested positive for COVID 19 and returns to school after the 5th day of isolation without symptoms, they will need to be masked in the building and on the bus for days 6-10 of their infectious period.** If you have any further questions about this memo or the newest regulations, please do not hesitate to call the school. **Reminder: we will have masks and COVID 19 tests kits available for all students and staff when requested.** Again, thank you for your patience and understanding as we continue to work through these times.
