Instructional Technology Plan - 2026-2029 Instructional Technology Plan**II. Strategic Technology Planning**

II. Strategic Technology Planning**1. What is the overall district mission?**

What is the overall district mission?

Crown Point Central School is an active school family working and growing together in an open, nurturing environment. Our aim is to instill in each child a desire to achieve high standards of excellence, social, emotional and physical skills. These goals will enable students to function as contributing members of society. CPCS seeks to create a challenging learning environment that encourages high expectations for success through development-appropriate instruction that allows for individual differences and learning styles. Each student's self-esteem is fostered by positive relationships with students and staff. We strive to have our parents, teachers, and community members actively involved with our students' learning.

2. What is the vision statement that guides instructional technology use in the district?

Crown Point Central School is located in a small rural community bordered by Lake Champlain to the East and is a part of the Adirondack Park. Its greatest strength is the community spirit and sense of independence fostered in part by the town's rural nature, small population, and its historical heritage that dates back to the founding of our country. The greatest challenge facing the district is relative to the fact that modern computer technology is changing both how we educate children and what they need to learn in order to compete in an evolving global economy. We are involved in a technological revolution based on acquisition, interpretation, and dissemination of large amounts of information. We need to maintain a comprehensive plan to integrate computer technology-based learning strategies, allowing our students to be fully prepared to participate successfully in our emerging technological society and to be eligible for State Aid for instructional computer technology expenses.

3. At the start of the 2026-27 school year, will the district provide a dedicated mobile device for every student in all grades?

Yes

Instructional Technology Plan - 2026-2029 Instructional Technology Plan**V. NYSED Initiatives Alignment**

Page Last Modified: 04/20/2026

V. NYSED Initiatives Alignment

1. How will the district's use of instructional technology support a comprehensive and sustained effort to improve student performance and academic standards, while also addressing the need to provide equitable learning opportunities "everywhere, all the time" (National Technology Plan)?
 - How technology is integrated into teaching and learning throughout the district - Through these supports and resources, the district will continue to deepen teachers' and administrators' understandings of the uses of technology to support learning and achievement.
 - Explain the extent to which technology is used by teachers to facilitate their practice - Our role is to provide guidance, oversight and support to successfully integrate technology into all aspects of teaching and learning.
 - The extent to which technology is used by students to demonstrate understanding of skills and concepts - The use of technology to support teaching and learning is no longer an option in our classrooms. For decades, we have watched as technology has been used as a reward or been used as an add-on activity when there is time in the day. This has led to mediocre, inconsistent experiences for our students.
 - The extent to which technology is used to provide multiple pathways to access and participate in learning. - As such, we must look for ways to integrate technology at a deeper level moving beyond just using it to replace a traditional activity once done on paper with pencil. Instead technology gives us access to a much bigger classroom with the ability to reach out to experts outside the walls of our schools, the ability to create multimedia worlds that demonstrate creativity and understanding, the ability to share work and receive feedback with someone beyond the teacher. We can modify and redefine our traditional classroom tasks and in doing so, open doors to easy pathways to creativity, critical thinking, communication and collaboration.
2. **At the start of the 2026-27 school year, will the district offer full-time virtual instruction to any students? (Select all that apply)**
 - ☐ Yes. Our district operates a full-time virtual instruction program.
 - ☒ Yes. One or more of our students will attend a program operated by a BOCES or another public school district.
 - ☐ None of our students will participate in a full-time virtual instruction program.
 - ☐ Other
3. If the district files or has filed a Smart Schools Investment Plan (SSIP) to apply for Smart Schools Bond Act funds, all responses in this survey align with the district's response to any related question(s) in the SSIP.

The district does not have an active SSIP.
